Rotary

Donate Blood to Save Lives

Rotary Blood Centre
Near Batra Hospital, Tughlakabad, New Delhi
Rotary International Districts 3011 & 3012

The Rotary Blood Centre provides NAT tested leukoreduced & leukodepleted blood.

15,000

Units of blood collected annually and processed into various components.

30,000

Units of blood components issued every year to those in need.

ABOUT US

Rotary Clubs of District 3010 (now 3011 and 3012) set up a voluntary blood centre in 2002 under the leadership of Late Shri Sudarshan Aggarwal, former Governor of Sikkim and Uttrakhand, as a public service initiative to provide safe blood to people in life-threatening situations.

OUR PROCESS

The Rotary Blood Centre is fully equiped with state of art lab where all testing and processes take place. The blood is cross-matched before being issued to patients.

Blood collection

Rotary Blood Centre mainly collects blood from non-remunerative voluntary donors at donation camps organized by Rotary Clubs at colleges, corporate offices, religious gatherings and residential areas.

Blood screening

State-of-the-art equipment is used to screen each unit of blood for:

- Transfusion-transmissible infections
- NAT for HIV, HBV and HCV
- Malaria
- Syphilis
- HBc Ab
- Antibody screening
- Rh phenotyping

Blood separation

Each unit of blood collected is separated into 2-3 blood components so that blood can be used rationally.

OUR MOTTO: NO ONE SHALL SUFFER FOR WANT OF BLOOD

Rotary Blood Centre has been a pioneer in issuing blood on a 'No-Replacement' basis.

We also provide free blood to:

- Patients below the poverty line
- Patients with blood cancer, HIV and other blood disorders
- Patients with thalassemia who are registered with Rotary Blood Centre

ADDITIONAL SERVICES

Plasmapheresis facility and Thalassemia Screening through Bio-Rad D-10 Dual Digital Analyzer

UPCOMING PROJECTS

Thalassemia transfusion facility for in-house blood transfusion.

UPGRADATION PLANS

For equipment and facilities at the Rotary Blood Centre.
